Stage 4 Basic Facts No 5 Strategy: Half facts from 20

$2 - 1 =$	Half 14 =	$\frac{1}{2}$ of 18 =
$4 - 2 =$	Half 6 =	$\frac{1}{2}$ of 4 =
$6 - 3 =$	Half 10 =	$\frac{1}{2}$ of 10 =
$8 - 4 =$	Half 8 =	$\frac{1}{2}$ of 20 =
$10 - 5 =$	Half 20 =	$\frac{1}{2}$ of 12 =
$12 - 6 =$	Half 2 =	$\frac{1}{2}$ of 8 =
$14 - 7 =$	Half 18 =	$\frac{1}{2}$ of 2 =
$16 - 8 =$	Half 12 =	$\frac{1}{2}$ of 6 =
$18 - 9 =$	Half 16 =	$\frac{1}{2}$ of 16 =
$20 - 10 =$	Half 4 =	$\frac{1}{2}$ of 14 =

Strategies for solving these problems:

- Halves are the opposite of the doubles.
- $6 + 6 = 12$, so $\frac{1}{2}$ of 12 = 6.
