Stage 4 Basic Facts No 6 Strategy: Double and half facts mixed

| | | |
|-----------------------|-----------------------|-----------------------|
| $7 + 7 =$ | $20 - 10 =$ | $\frac{1}{2}$ of 12 = |
| $2 + 2 =$ | $4 - 2 =$ | $5 + 5 =$ |
| $10 - 5 =$ | $\frac{1}{2}$ of 18 = | $8 + 8 =$ |
| $\frac{1}{2}$ of 20 = | Double 10 = | $10 + 10 =$ |
| $\frac{1}{2}$ of 8 = | Double 4 = | Double 9 = |
| $4 + 4 =$ | $1 + 1 =$ | Double 8 = |
| $9 + 9 =$ | $3 + 3 =$ | Double 3 = |
| $16 - 8 =$ | Double 5 = | $\frac{1}{2}$ of 4 = |
| $\frac{1}{2}$ of 2 = | $18 - 9 =$ | Double 2 = |
| Double 7 = | $14 - 7 =$ | $\frac{1}{2}$ of 6 = |
| Double 6 = | $\frac{1}{2}$ of 14 = | $14 - 7 =$ |
| $\frac{1}{2}$ of 16 = | $6 + 6 =$ | Double 1 = |
| $\frac{1}{2}$ of 10 = | $\frac{1}{2}$ of 2 = | $12 - 6 =$ |

Strategies for solving these problems:

- Halves are the opposite of the doubles.
- $6 + 6 = 12$, so $\frac{1}{2}$ of 12 = 6.
