

Practise

Stage 5

Basic Facts No 4

Strategy: Number Bonds to 20

<input type="text"/> + 12 = 20	20 + <input type="text"/> = 20	6 + <input type="text"/> = 20
13 + <input type="text"/> = 20	<input type="text"/> + 11 = 20	12 + <input type="text"/> = 20
15 + <input type="text"/> = 20	1 + <input type="text"/> = 20	7 + <input type="text"/> = 20
2 + <input type="text"/> = 20	18 + <input type="text"/> = 20	<input type="text"/> + 13 = 20
<input type="text"/> + 6 = 20	9 + <input type="text"/> = 20	17 + <input type="text"/> = 20
<input type="text"/> + 19 = 20	<input type="text"/> + 2 = 20	8 + <input type="text"/> = 20
19 + <input type="text"/> = 20	11 + <input type="text"/> = 20	<input type="text"/> + 16 = 20
5 + <input type="text"/> = 20	4 + <input type="text"/> = 20	<input type="text"/> + 14 = 20
<input type="text"/> + 20 = 20	<input type="text"/> + 3 = 20	14 + <input type="text"/> = 20
3 + <input type="text"/> = 20	16 + <input type="text"/> = 20	0 + <input type="text"/> = 20
0 + <input type="text"/> = 20	<input type="text"/> + 7 = 20	<input type="text"/> + 7 = 20
<input type="text"/> + 5 = 20	<input type="text"/> + 18 = 20	<input type="text"/> + 8 = 20

Strategies for solving these problems:

- Use the addition facts you already know.
- Split the teen number and add the ones. For example $15 + \underline{\quad} = 20$ can be solved by splitting the 15 into 10 and 5 and then adding $5 + 5$ to make 10.
- Make the first number up to 10 and add on another 10 to make 20. For example $6 + \underline{\quad} = 20$ can be solved by knowing that $6 + 4 = 10$ and another 10 equals 20, so the answer is 4.
